

Dan Petruso - Team Member Evaluation

Elizabeth - Created the Google doc that we used to make the project outline pdf as well as the Zoom room. She had the idea to use a slider to show how well a person's day went.

Leelee - Downloaded other daily journal apps to research good ideas that we can add to our app. She had the idea to use emojis to describe how a person's day went so we added emojis to the slider to show a person's mood.

Jeremy - Created the git repository that we will be using for the project.

Myself - I created the storyboard and UI image for the app.

Most of the work overall was evenly distributed. We made sure we are all on the same page when it comes to working on the project. Even though we split up the work in the breakdown section, we all agreed that we would help each other when needed.
